

# UNUSED MEDICINES: WE DON'T WANT THEM ANYMORE!!

## ONE DAY AT THE PHARMACY

The doctor has prescribed a box of 100 capsules. Is this a known treatment?

**NOT AT ALL!**  
It's a new medicine - we're doing a test!

In that case, I'll give you a small box and you'll come back if the medicine suits you...

...in this way, we avoid waste!

So true!!!

## CRISIS IN THE BATHROOM

Oh boy! What a mess! What am I going to do with all these medicines I no longer need? Some of them aren't even out of date !!!!

Let's make some room! It's good for the bin !!!

So what do I do with my old tablets ???

**Nooooooooo !!!**  
Medicines are chemicals that need to be disposed of by professionals! Otherwise it pollutes the planet !!!

I've got a great idea!

Um, hello.. I have some medicines to donate to send to your projects abroad !!

We don't send medicines to the field. We buy them locally, because it's good for the local economy and prevents them from ending up on the black market. (...)

**SOMEWHERE IN THE FIELD**

I don't know this medicine... Besides, it's about to expire!

What's it for? Oh dear... The instructions are written in a language I don't understand!

I had no idea! It's so terrible...

(...) but there's always a solution ...

**Solution**

(...) and there are other problems ...

**big problem**

**big problem**

**WE TRY TO KEEP OUR UNUSED MEDICINES TO A MINIMUM ! AND WHEN WE HAVE SOME, WE BRING THEM BACK TO THE PHARMACY !!!**

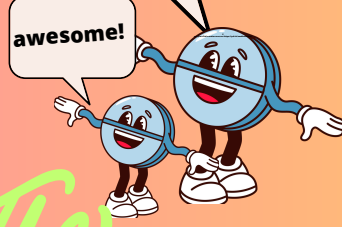

Damn, I'm hot...

I'm melting away...

I can't take it any more !!!

For my part, I'm fine, I'm full of anti-depressants!

*The End*

**TRANSPORT, STORAGE AND DISTRIBUTION DO NOT ENSURE THAT THE QUALITY OF MEDICINES IS MAINTAINED. THE PRODUCTS SENT DO NOT CORRESPOND TO THE NEEDS OF THE POPULATION. IN ADDITION, SOME MEDICINES ARE IN EXCESS AND OTHERS ARE IN SHORT SUPPLY.**
